

PARENTAL CONTROLS FOR ANDROID TABLETS

If you have an Android tablet running Android OS version 4.2 or above, your device has the ability to quickly switch between a number of different user accounts. This means you can set up one user account for yourself and another, safer one for your children to use!

You can then restrict a user account to block access to apps, games and features which might be inappropriate for your children. Let's find out how to create a second user account and exercise parental control over the way it works:

1. Open your apps list and tap on the **Settings** icon.
2. Scroll down the settings page until you find **Users**, then press on it. On tablets like Samsung's, you might need to tap on the **General** tab at the top of the screen first.
3. Choose to add a new profile by tapping on the **small icon of a person** next to the magnifying glass in the top-right corner. As we're setting this up as a child's account, touch **restricted profile**.
4. At this stage you may be asked to set up a PIN or passcode for your user account. This will only appear if you haven't already secured your profile, and is necessary in order to stop your children bypassing parental controls by simply logging into the phone as you.
5. You will now see a list of all the apps currently installed on your tablet. Scroll down this list, adding a **tick** next to each app you want to block access to. When ticked, the app is *allowed*.
6. The account is now set up, ready for your children to use! To access the new profile, lock your tablet. When you go to unlock it again, the screen will display icons for each user profile in the top-right corner. Tap on your child's profile name to sign in as them. Any apps you turned on in the previous step will be accessible. Any others won't appear and can't be accessed until you switch users at the lock screen.

How to Set Parental Controls on your Samsung Galaxy S5

1. In the first place, you must go to your Samsung Galaxy S5's Home screen – in order to do so, you have to press the Home key (lower-middle hard key) on your smartphone or the Back key (lower-right shift key) repeatedly until you are finally taken to the Home screen;
2. Tap the Apps icon on the lower-right part of your Galaxy S5's screen that can be found your phone's Home screen;
3. You will be taken to the application folder; there you can see all applications installed on your phone;
4. Tap the Kids Mode icon (the picture of an alligator) in order to open the application;
5. This will take you to the Kids mode page; here you must tap the Parental Control icon (we are referring to that icon of a parent and his child holding hands);
6. Kids Mode will ask for the PIN code; don't hesitate to enter the PIN code for accessing the application;
7. After you enter the PIN code, you will be taken to the activity page where it will display the profile of your child;
8. From the activity page, tap on the More Options button if you want to view the Parental Control options;
9. From the Parental Control menu, you can edit and set restrictions on Kids Mode based when it comes to:
 - Kids Profile - it lets you view and edit the profile page of your child including your child's name, profile picture and birthday;
 - Activity - it offers you an activity summary of Kids Mode including the most frequently used applications, as well as the total hours that your little ones have used Kids Mode;
 - Applications - it allows you to add or remove certain inappropriate applications on Kids Mode;
 - Daily playtime limit - it gives you the possibility to set a certain number of hours for your child to play with your Samsung Galaxy S5 device. Kids Mode will remind them of the remaining hours and minutes from time to time and when reaching the daily limit, Kids Mode will go to sleep mode by displaying a sleeping crocodile;
 - General - it lets you Block the Back key when on Kids Mode, change the application's PIN and Reset Kids Mode;
 - Media - it lets you to add and remove music files, video files, as well as other media files from Kids Mode;
 - Kids Store - allows you to download and install applications specific to Kids Mode. Some of these applications are indeed free, but others require purchase – this is something that you should know from the start and don't forget that all the applications installed from the Kids Store don't appear in the normal applications folder. You have to go to Kids Mode in order to find and use them.
 - That was all! You have just learned how to set Parental Control for Kids Mode on your Samsung Galaxy S5;

Don't hesitate to return to Kids Mode by tapping the Back key.
